

SYNTHETIC DEMONSTRATION DATA - NOT A REAL BANK ASSESSMENT

Board assessment packet

Executive summary

Harbor Ridge Critical-Service Assessment identifies 12 critical services. Automated analysis recommends candidates and findings for accountable human review; it does not replace business, risk, legal, compliance, audit, or board judgment.

Assessment scope

Harbor Ridge Bank; Fictional regional banking; classification: Internal.

Critical services

- Customer authentication: Outcome disruption can harm customers or market obligations.
- Account inquiry: Outcome disruption can harm customers or market obligations.
- Core deposit processing: Outcome disruption can harm customers or market obligations.
- ACH: Outcome disruption can harm customers or market obligations.
- Wire transfers: Outcome disruption can harm customers or market obligations.
- Card authorization: Outcome disruption can harm customers or market obligations.
- Card settlement: Outcome disruption can harm customers or market obligations.
- ATM withdrawals: Outcome disruption can harm customers or market obligations.
- Treasury management: Outcome disruption can harm customers or market obligations.
- Fraud monitoring: Outcome disruption can harm customers or market obligations.
- Liquidity reporting: Outcome disruption can harm customers or market obligations.
- Regulatory reporting: Outcome disruption can harm customers or market obligations.

Approved impact tolerances

- Manual workaround absent or untested

Third-party dependencies

- Core service provider: Synthetic core service provider service; recovery evidence: Never
- Payment processor: Synthetic payment processor service; recovery evidence: 2026 synthetic test
- Cloud provider: Synthetic cloud provider service; recovery evidence: 2026 synthetic test
- Telecommunications provider: Synthetic telecommunications provider service; recovery evidence: Never
- Managed security provider: Synthetic managed security provider service; recovery evidence: 2026 synthetic test
- Card network liaison: Synthetic card network liaison service; recovery evidence: 2026 synthetic test
- ACH operator liaison: Synthetic ach operator liaison service; recovery evidence: Never
- Recovery support firm: Synthetic recovery support firm service; recovery evidence: 2026 synthetic test

Security-coverage gaps

- Security event monitoring: maturity 1/8; limitation: Coverage and testing vary; tool ownership does not guarantee effectiveness.
- Endpoint detection: maturity 2/8; limitation: Coverage and testing vary; tool ownership does not guarantee effectiveness.
- Network detection: maturity 3/8; limitation: Coverage and testing vary; tool ownership does not guarantee effectiveness.
- Identity threat detection: maturity 4/8; limitation: Coverage and testing vary; tool ownership does not guarantee effectiveness.
- Fraud detection: maturity 5/8; limitation: Coverage and testing vary; tool ownership does not guarantee effectiveness.
- Cloud monitoring: maturity 1/8; limitation: Coverage and testing vary; tool ownership does not guarantee effectiveness.
- Vulnerability management: maturity 2/8; limitation: Coverage and testing vary; tool ownership does not guarantee effectiveness.
- Backup-integrity validation: maturity 3/8; limitation: Coverage and testing vary; tool ownership does not guarantee effectiveness.
- Configuration monitoring: maturity 4/8; limitation: Coverage and testing vary; tool ownership does not guarantee effectiveness.

Manual-workaround limitations

- Customer authentication manual continuity: throughput 0%; test: Requires improvement
- Account inquiry manual continuity: throughput 25%; test: Requires improvement
- Core deposit processing manual continuity: throughput 25%; test: Requires improvement
- ACH manual continuity: throughput 25%; test: Requires improvement
- Wire transfers manual continuity: throughput 0%; test: Requires improvement
- Card authorization manual continuity: throughput 25%; test: Requires improvement
- Card settlement manual continuity: throughput 25%; test: Requires improvement
- ATM withdrawals manual continuity: throughput 25%; test: Requires improvement
- Treasury management manual continuity: throughput 0%; test: Requires improvement
- Fraud monitoring manual continuity: throughput 25%; test: Requires improvement
- Liquidity reporting manual continuity: throughput 25%; test: Requires improvement
- Regulatory reporting manual continuity: throughput 25%; test: Requires improvement

Recommended tabletop scenarios

- Enterprise identity compromise: Applies to synthetic shared dependencies and evidence-based gaps.
- Payment processor outage: Applies to synthetic shared dependencies and evidence-based gaps.
- Cloud-region failure: Applies to synthetic shared dependencies and evidence-based gaps.
- Data-integrity uncertainty: Applies to synthetic shared dependencies and evidence-based gaps.
- Backup compromise: Applies to synthetic shared dependencies and evidence-based gaps.

Corrective-action roadmap

- [High] Validate separation and an alternate capability. (Chief Risk Officer)
- [High] Establish and test independent recovery control. (Chief Risk Officer)
